50X1-HUM

1. The construction of a reservoir on the right bank of the Oder River, near Olawa and Ludnow, has been planned in order to increase the navigable depth of the river between Redzin (sic) and the mouth of the Warta River. The depth of the water in this sector sometimes falls below 70 cm, and in dry summers is only 35 cm. Surveying of the Odra is in progress in preparation for the building of the reservoir. The reservoir will cover an area of approximately 4,000 hectares.
2. The State Glass Works (Panstwowa Huta Szkla) located at Wymiarki, near Zary, produces 10,000 square meters of signal glass (szkle sygnalowe) per month. Approximately 20 percent of the production is exported to the USSR.
